

The Baytex Stake Puller is the fastest tool on the market for removing large numbers of stakes. Available in two options: Standard for regular stakes and Structure for structure stakes.

**Key Features**

- One piece design with interchangeable heads for different stake diameters
- Works on pillar jack principle
- Light weight, easy to carry and move
- Large stable base won't sink into soft ground
- Ergonomically designed to minimise back strain
- Structure puller has extra tongue to lever base plates
- Structure puller is ideal for removing single head stakes

**Specifications**

- Leverage: 10:1 (approx)
- Weight: 11.5kg (25lb)
- OA Height: 1600mm (63")
- Material: Galvanised steel

**Using the Standard Stake Puller**

**Using the Structure Stake Puller**
