

ADDING ELEGANCE & STYLE TO ANY OCCASION

Baytex Liners

In soft gathers or fitted flat panels gives you options to project your personality.

SIMPLICITY · PERFORMANCE · STYLE

Keeping you covered and adding style

Fabric

Baytex Liners are manufactured from 100% polyester fire retardant fibre for maximum durability and easy care.

All Baytex Silkline fabrics are inherently flame retardant, they have a soft finish with a beautiful silky sheen that resists hard creasing.

Configurations

Available in either flat or gathered styles to suit Pagodas, Frame Tents & Pole Tents. Supplied with all pulleys, halyards and mounting hardware to install your linings.

Specifications

All linings are supplied in colour coded carry bags. Valances are included as standard.

Fire Rating Certificates & Flame Retardance

- DIN 4102-1
- AS/NZ 1530;PtsII & III
- NTA 8007:2007 'Brandgedrag van Verseiringsmaterialen' Classification B
- NF P 92-512:1986-M1
- BS5867 Part 2 Type B
- NFPAI 701 (small scale)
- CPAI-84
- New York Board - Bull #44

Simple Set Up

Load points are locked together with sister clips. A wall cord is incorporated into the eave line for hanging liner walls. Joins between panels are closed with continuous velcro tape. Installation accomplished from ground level.

Manufacturing

CAD designed and computer cut for dimensional accuracy. Manufactured onsite at Baytex for the last 40 years.

for flat/smooth liners

Fetes / Pagoda Liners

Baytex manufactures an extensive range of liners to fit almost all brands of Pagodas on the market.

Simply attach pole bridle to centre pole top before PVC roof is installed and pre-thread the halyard. The lining can be hooked onto a pre-installed 4mm steel wire eave cable or the pvc roof wall cord with the sister clips.

Velcro the joins and raise liner into position with the halyard cord.

Clipframes / Frame Tent Liners

Baytex manufactures an extensive range of liners to fit almost all brands of linings to fit almost all brands of commercially available Frame Tents and Marquees up to 15m wide.

Eave attachment is via regularly spaced tent hooks fixed along the eave web of the lining designed to attach directly to the wall cor of the marquee or tent. The ridgeline is hoisted into position with a halyard cord that passes through a becket at each apex point on the marquee and is locked off at the eave of the marquee. For marquees without a wall cord a pre-installed 4mm steel wire eave cable or custom attachment device may be required.

Electron / Pole Marquee Liners

The Pole Marquee Series is designed for a wide range of single row and multi row pole marquees.

Installation of this liner requires a pre-installed pulley and halyard assembly at the top of each centre pole during marquee erection. Suspended from this is a simple two piece bail ring assembly to support the lining at each centre pole. Lining eave attachment is via regularly spaced tent hooks fixed to the eave web of the lining and designed to attach directly to the wall cord of the Pole Marquee. Pole shrouds are available to dress the centre poles, these are designed to attach directly to each bail ring assembly which make installation extremely simple.
