

NEW PRODUCT RELEASE: GEOFLEX STRETCH TENT

CREATE STYLISH SPACES WITH NEW FOUND FLEXIBILITY & VERSATILITY

Baytex GeoFlex Stretch Tent

With its two way stretch fabric you will be able to create a variety of configurations, set up on a sloped area, stretch over gardens, attach to buildings. The options are endless.

SIMPLICITY · PERFORMANCE · STYLE

Simplicity, Style and Flexibility

Baytex's GeoFlex Stretch Tent offers greater flexibility. Set up on a sloped area, stretch over gardens, attach to buildings, join around corners ... the options are endless, and your customers will be impressed by the stylish design. A single tent can be erected in a variety of configurations in record time, or additional tents are easily linked together to create a larger covered area.

Fabric

GeoFlex Stretch Tents are NZ made from internationally sourced two way stretch fabric with a PVC coating and fire retardant properties to meet local code requirements. Constructed using high frequency welded seams, giving 100% waterproofing and durability. Engineered load testing of key structural tensioning components are all part of Baytex's design philosophy ensuring the performance requirements exceed industry expectations.

Hardware

The GeoFlex Tent system is either supplied as a complete kit with roof in a storage/freight bag, NZ sourced 76, 65 & 50mm anodized alloy centre & side poles (bag optional), Industry standard rubber dome & base caps, high-quality stainless-steel bow shackles, load rated ratchet guy straps and pegging stakes. Walling, gutters and groundsheets are also available on request.

Set Up & Training

A full installation training program can be provided upon request by our highly experienced Baytex sales consultants – talk to the Baytex team for pricing options.

Manufacturing

Engineered load testing of key structural tensioning components are all part of Baytex's design philosophy ensuring the performance requirements exceed industry expectations. CAD designed and computer cut for dimensional accuracy at Baytex.

Roof in a storage/freight bag, NZ sourced 76, 65 & 50mm anodized alloy centre & side poles (bag optional), Industry standard rubber dome & base caps, high-quality stainless-steel bow shackles, load rated ratchet guy straps and pegging stakes.
